5. Economic Calendar and Red Folder Time-Locks (Protocol F)

Day	Time (ET)	Event	Currency	Impact
Tuesday May 26	10:00 AM	CB Consumer Confidence (May)	USD	HIGH — Red Folder
Thursday May 28	8:30 AM	Advance Durable Goods Orders (Apr)	USD	HIGH — Red Folder
Thursday May 28	8:30 AM	Initial Jobless Claims	USD	MODERATE
Thursday May 28	10:00 AM	New Home Sales (Apr)	USD	MODERATE
Friday May 29	8:30 AM	PCE Price Index (Apr)	USD	HIGH — Red Folder (KEY INFLATION)
Friday May 29	8:30 AM	Personal Income/Spending (Apr)	USD	MODERATE

Red Folder Time-Locks:

• Tuesday 10:00 AM: Consumer Confidence — Pre-event lock 9:55 AM, resume 10:15 AM

• Thursday 8:30 AM: Durable Goods + Jobless Claims — Pre-event lock 8:25 AM, resume 8:45 AM

• Friday 8:30 AM: PCE Price Index — Pre-event lock 8:25 AM, resume 8:45 AM. THIS IS THE WEEK'S MOST IMPACTFUL EVENT — PCE is the Fed's preferred inflation gauge and could trigger significant DXY movement.

7. Macro Shape Chain Map (Engine 2)

Primary Timeframe: 1H | Structural Validation: 4H

Step 1: Current Shape Identification

Current Shape	SWING SCALP (SS)
Anchor Zone	#2 Upper Resistance (99.15-99.25)
Pressure	MODERATE-HEAVY (8/14)
ZFP	20%
Price Position	Within equilibrium band between Zone #2 (99.15-99.25) and Zone #3 (98.92-99.05). DXY has been consolidating in a 98.92-99.52 range for the past 5 sessions. The 99.45-99.52 ceiling has rejected price 4 times (Repeated High Magnet). The 98.92 floor was just established on May 25.
Regime	MOMENTUM — but transitioning toward SS as price consolidates near the top of the range.

Step 2: Transition Probability Assessment

Transition	Trigger Zone	ZFP	Condition	Probability
SS → BS (upside)	#1 Resistance Ceiling (99.45-99.52)	25%	Zone failure with confirmation would trigger upside BS toward 100.12-100.16	MODERATE
SS → BS (downside)	#3 Equilibrium (98.92-99.05)	15%	Zone failure would trigger downside BS toward Zone #4 (98.53-98.68)	LOW-MODERATE
SS → WL (whiplash)	#1 (99.45-99.52)	25%	Price spikes to 99.50+ then rejects — Liquidity Sweep of supply-side LSZ	MODERATE-HIGH (4x rejection)
SS continues	Both bounding zones	—	Both bounding zones hold; option cage Mon/Tue may pin price	MODERATE

Step 3: Primary Chain Extension

Primary Chain: SS → WL (at ceiling) → R → SS → BS (direction depends on Friday PCE)

Chain Confidence: 0.50 × 0.65 × 0.65 = ~21% cumulative — drops below 25% at R step, but day-specific analysis supports partial chain

Step	Current Shape	Zone / Condition	Prediction	Trigger / Rationale	Confidence
1	SS	Zone #2 (99.15-99.25) ZFP=20% MODERATE-HEAVY (8/14)	SS → WL	Price tests Resistance Ceiling (99.47-99.52), Liquidity Sweep of supply-side LSZ, then rejection. 4x Repeated High Magnet at 99.47-99.52. Each prior test was rejected. ZFP=25% means zone holds >75% of the time.	MODERATE-HIGH
2	WL → R	Zone #3 (98.92-99.05) ZFP=15%	R (recovery)	After ceiling rejection, price drops to mid-range equilibrium zone for temporary stabilization	MODERATE
3	R → SS	Option cages (Mon/Tue) pin price	SS continues	Consolidation continues mid-week as market awaits Friday PCE data	MODERATE
4	SS → BS	Friday PCE data	BS (direction TBD)	Direction of BS depends on PCE outcome. Hot PCE → upside BS. Cool PCE → downside BS.	TRIGGER-DEPENDENT

Step 4: Alternative Chain Analysis

Alternative Chain: SS → BS (upside breakout through ceiling)

Decision Zone	#1 Resistance Ceiling (99.45-99.52) | Pressure: HEAVY (10/14) | ZFP: 25%
If Zone FAILS	Sustained break above 99.55 for 15+ min: Upside BS activates. Target: 100.12-100.16 (Repeated High Magnet, 3 occurrences). Measured move from 99.52 ceiling to 98.92 floor = 0.60 range → target 99.52 + 0.60 = 100.12 (anchored to structural extreme).
If Zone HOLDS	Rejection at 99.50+: Primary chain (WL → R → SS) activates.

Step 5: Day-by-Day Session Map

DAY: Monday May 25 | Predicted Dominant Shape: SS (consolidation) | Confidence: HIGH

Asian (6PM-2AM ET)	SS — Range-bound between 98.95-99.20 (prior session range)
London (2AM-8AM ET)	SS — Directional indecision; price oscillates in equilibrium zone
NY Pre-Cut (8AM-10AM)	SS — Option cage from €1.1bn EUR/USD 1.1600 (DXY ≈ 99.18); pinning near 99.18
NY Spring Release (10:01 AM)	DECISIVE — If ceiling test: WL at 99.47-99.52. If option pin holds: SS continues
NY Post-Cut (10:01AM-5PM)	SS or minor WL — Price likely settles near 99.15-99.25
Anchor Ceiling	Zone #1 (99.45-99.52) | HEAVY (10/14) | ZFP: 25%
Anchor Floor	Zone #3 (98.92-99.05) | MODERATE (7/14) | ZFP: 15%
Option Cage	EUR/USD 1.1600 €1.1bn → DXY 99.18

DAY: Tuesday May 26 | Predicted Dominant Shape: SS → potential WL at ceiling | Confidence: MODERATE-HIGH

Asian (6PM-2AM ET)	SS — Quiet range; price respects prior day close area
London (2AM-8AM ET)	SS or initial ceiling test — London flow may probe 99.45+
NY Pre-Cut (8AM-10AM)	SS — MASSIVE option cage: €3.5bn EUR/USD 1.1600 (DXY ≈ 99.18) + €1.1bn 1.1540 (DXY ≈ 99.48). Price pinned
NY Spring Release (10:01 AM)	DECISIVE — Option cage release. If price was pinned near 99.18: likely Spring Release UP toward 99.43-99.48. If price was near 99.48: risk of WL rejection
NY Post-Cut	WL or SS — Key test of 99.47-99.52 ceiling. 4x Repeated High Magnet makes rejection likely
Macro Catalyst	CB Consumer Confidence 10:00 AM — Red Folder. Volatility trigger concurrent with Spring Release
Anchor Ceiling	Zone #1 (99.45-99.52) | HEAVY (10/14) | ZFP: 25% — 4x rejection magnet
Option Cage	EUR/USD 1.1600 €3.5bn → DXY 99.18 | EUR/USD 1.1540 €1.1bn → DXY 99.48 — CRITICAL DUAL CAGE

DAY: Wednesday May 27 | Predicted Dominant Shape: R (recovery) or SS | Confidence: MODERATE

Shape Context	After Tuesday ceiling test/rejection, price likely stabilizes at mid-range. Recovery or continued SS
Range	Floor: Zone #3 (98.92-99.05) | Ceiling: Zone #2 (99.15-99.25)
Triggers	No high-impact USD data. No option expiry data available. Structural pillars only
Session	Asian: SS | London: mild directional probe | NY: SS or R (stabilization)
Confidence	MODERATE — shape depends on Tuesday outcome. If WL occurred, R is likely. If SS continued, SS persists

DAY: Thursday May 28 | Predicted Dominant Shape: SS (building tension before PCE) | Confidence: MODERATE

Shape Context	Pre-PCE positioning. Market compresses into tight range as traders avoid directional bets
Range	Floor: Zone #3 (98.92-99.05) | Ceiling: Zone #2 (99.15-99.25)
Triggers	8:30 AM Durable Goods + Jobless Claims — Red Folder time-lock 8:25-8:45 AM | 10:00 AM New Home Sales — moderate impact only
Session	Asian: SS | London: SS | NY Pre-8:30: SS | NY Post-data: possible directional move if surprise

DAY: Friday May 29 | Predicted Dominant Shape: BS (BREAKOUT SURGE) | Confidence: TRIGGER-DEPENDENT

Shape Context	PCE Price Index at 8:30 AM is the WEEK'S PRIMARY CATALYST. This will determine BS direction
Upside BS Trigger	Hot PCE (above consensus) → DXY surges through Zone #1 ceiling (99.52) toward 100.12-100.16
Downside BS Trigger	Cool PCE (below consensus) → DXY breaks through Zone #3 floor (98.92) toward Zone #4 (98.53-98.68)
Range	Upside target: 100.12-100.16 (3x Repeated High Magnet) | Downside target: 98.53-98.68 (5-MA cluster + BoM Demand)
Risk	Friday position squaring amplifies PCE move. End-of-week liquidity drain may exaggerate the breakout
Key Levels	BS ceiling: 99.55 (breakout confirmation) | BS floor: 98.89 (breakdown confirmation)
