SESSION-SPECIFIC EXECUTION NOTES

Session	Setup Focus	Pair Priority
London	Swing Scalps PRIMARY. 95% of NY swings don't start until 2nd half of NY session. Load up on entries during London. DWL Inverse setups active.	GU = primary scalp pair (3-4x more London ops). AU = secondary scalp. EU = swing scalp at range edges.
NY	Swing setups PRIMARY. Most HTF setups hit TP during NY session. Reinforcement entries trigger during NY. Breakout surges start 2nd half NY.	EU = primary swing pair. AU = secondary swing. GU = swing if setup triggers. DXY = master compass direction.
Good Friday	EXTREME CAUTION. Thin liquidity. NFP at 08:30 ET = Red Folder deferral until 09:00 ET. No new entries within 30 min of NFP. Scalp ONLY after NFP release + 30 min clearance.	All pairs = scalp only with reduced size. Limit orders PROHIBITED before NFP. Open positions with SLs in profit = acceptable.

DOMINANT MACRO THEMES — WEEK OF MAR 30

US-Iran / Strait of Hormuz: SINGLE DOMINANT DRIVER all week. Oil elevated, USD safe-haven + energy advantage, EUR/AUD under pressure. Trump 'victory' Apr 1 = brief risk-on. Trump address Apr 2 = risk-off resume. Nothing changes until Strait of Hormuz changes.

Month-End / Quarter-End Flows: Mar 30-31: Dollar buying into the fix (BofA). Contributes to Mon BS down in pairs, Tue WL up as flows complete.

NFP Massive Surprise: Apr 3: +178K vs +53.33K consensus (+224% above forecast). Unemployment 4.3% vs 4.43% expected. Dollar-positive but Good Friday thin liquidity amplifies volatility. ISM Services PMI 54.0 (down from 56.1), Prices Index 70.7 (up from 63.0) = stagflation signal.

Option Strike Sequence: EUR/USD 1.1500 appears as CRITICAL OPTION WALL on Tue AND SIGNIFICANT MAGNET on Thu. This is a RECURRING level — maximum institutional interest. 1.1550 Mon + 1.1600 Wed create a three-strike sequence defining the week's range.

SEQUENTIAL ZONE PATH MAP — KEY SETUPS

Price ALWAYS sweeps liquidity zone by zone, NEVER skips. Each intermediate zone = reinforcement entry or minor TP.

EUR/USD Setup #1 (LONG 1.1450 → TP 1.1600) — Zone Path:

Entry 1.1450 (D2 BoM Demand) → **Zone 1: D1 MoM Demand 1.1495-15** (R1 reinforcement at 1.1500, Fib Rocket FLR + CRIT WALL option) → **Zone 2: R1 MoM Supply 1.1545-75** (R2 reinforcement at 1.1555, Fib 1.382) → **Zone 3: R2 BoM Supply 1.1600-40** (TP2 at 1.1600, option strike 1.1600 SIG MAG) → TP3 extended 1.1630. **3 intermediate zones = 3 reinforcement entries = realistic path mapped.**

DXY Setup #1 (SHORT 100.52 → TP 99.10) — Zone Path:

Entry 100.52 (R1 BoM Supply 52wk high) → **Zone 1: R2 MoM Supply 100.00-25** (R1 reinforcement at 100.05 if breaks below) → **Zone 2: D1 MoM Demand 99.30-60** (R2 reinforcement at 99.65, Fib 1.382 FLR) → **Zone 3: D2 BoM Demand 98.80-99.10** (TP2 at 99.10). **Price must pass through R2 and D1 before reaching D2 = sequential sweep confirmed.**
